

For removal of odour from
treated ETP water

**"The Ultimate Solution for
Odour-Free Living."**

"OdoServe-EOC is a non-amine-based sulfide scavenger and broad-spectrum odour neutralizer formulated for ETPs, STPs, and waste sludge management. Unlike traditional solutions, it effectively neutralizes malodorous compounds like sulfides and mercaptans without producing harmful by-products. OdoServe-EOC targets the root causes of odour, providing efficient and safe odour control in industrial and wastewater treatment environments. Its use helps maintain regulatory compliance, improves the working environment, and ensures a cleaner and safer atmosphere for operators and nearby communities."

KEY FEATURES :

- › Effective control of sulfides and odours
- › Ensures compliance with H₂S and odour air quality standards
- › Eliminates hazardous and unpleasant conditions caused by hydrogen sulfide

HOW TO USE :

- › Add 5 to 10 ppm directly into the water flow/stream/tank to achieve odour free water.

BENEFITS :

- › Complete odour control without adding extra sludge to treated systems
- › Preserves equipment integrity and reduces H₂S-related corrosion costs
- › Non-toxic, Safe for everyone

**Bulk packaging
available in:**

50 Kg,
200 Kg.

Any Odour - Any Industry - OdoServe
